

Hemanth Gopalakrishna Yerasuri

Cloud & Network Engineer | OpenShift • Bare-Metal Automation • Cloud Networking

Hyderabad, India 500090 | +91 812 289 9437 | hemanth.krishna1@gmail.com | [LinkedIn](#) | [Credly](#) | [Website](#)

PROFESSIONAL SUMMARY

- Kubestronaut (CKA, CKAD, CKS, KCNA, KCSA) with 10+ years of experience across Telco and Cloud Infrastructure Engineering, specializing in large-scale OpenShift/Kubernetes platforms, bare-metal automation, and cloud networking.
- Proven track record operating 240+ production OpenShift clusters and deploying 15+ clusters (1500+ nodes) using bare-metal automation tools such as Redfish and Metal3.
- Strong foundation in networking protocols and infrastructure automation using Python, Bash, Go, and Ansible.
- AWS Certified Solutions Architect – Associate; Red Hat Certified Engineer (RHCE) in Red Hat OpenStack; hands-on experience with CI/CD pipelines (GitLab, ArgoCD), Prometheus, and Grafana.

CORE TECHNICAL SKILLS

- **Cloud & Container Platforms:** OpenShift (Kubernetes), OpenStack, AWS
- **Infrastructure & Bare-Metal Automation:** Ansible, Redfish, Metal3, custom Go/Python tooling, iDRAC, iLO
- **Networking & Protocols:** BGP, TCP/IP, IPv4/IPv6, mTLS, DNS, HTTP, SIP, DIAMETER
- **CI/CD & Version Control:** GitLab, ArgoCD, Git
- **Monitoring & Observability:** Prometheus, Grafana
- **Languages & Scripting:** Python, Bash, Go, Ansible
- **Operating Systems:** RHEL / Linux (RHCE, RHCSA)

WORK HISTORY

Sr Engr Cslt-Cloud — Verizon Data Services, Hyderabad

Sep 2023 – Present

- As part of the build team, deployed 15+ large-scale clusters (1500+ nodes) using bare-metal automation tools including Redfish and Metal3.
- Troubleshoot bare-metal host-level issues across iDRAC and iLO out-of-band management interfaces, ensuring reliable provisioning at scale.
- As part of the cloud operations team, managed and supported 240+ large-scale OpenShift clusters, handling upgrades, maintenance activities, troubleshooting, and ticket resolution.
- Improved troubleshooting and ticket resolution efficiency by 20% by developing custom Go-based scripts to automate data collection and command execution across multiple clusters.
- Developed a custom framework for organizing MOPs (Method of Procedures) using reusable templates, improving accuracy and consistency while generating documents 3X faster.
- Developed strong working knowledge of F5 SPK, Aspen Mesh, NetApp, and network protocols including IP, IPv6, BGP, and mTLS.
- Leveraged CI/CD pipelines (GitLab, ArgoCD) for day-to-day operations and maintenance; contributed to automation initiatives and AI-enabled POCs for increased efficiency.

Solutions Specialist — Nokia Solutions and Networks, Chennai

Feb 2018 – Aug 2023

- Involved in E2E (design, deployment, integration, and testing) of various network functions (IMS and 5G) on OpenStack and OpenShift.
- Obtained deep knowledge of network protocols (Ethernet, TCP/IP, networking stack, SIP, DIAMETER), 3GPP specs, and network elements in the 4G/5G domain.
- Developed a custom tool for site isolation leveraging network function (NF) expertise reducing maintenance window duration by 30% and minimizing downtime on live sites. This also enabled safer operations by eliminating manual errors.

System Engineer — Tata Consultancy Services, Hyderabad

Jan 2016 – Feb 2018

- Involved in design and execution of automation and manual testing, working with tools such as HP ALM and Selenium.

Research Assistant — SASTRA University, Thanjavur

Aug 2013 – May 2015

- Designed and built a wireless sensor network to continuously monitor toxic gas levels, using LPC2148 (ARM7) and Zigbee modules over UART protocol.

Research Intern — Calcutta University, Kolkata

May 2014 – Jun 2014

- Contributed to “Simulation and Testing of Various Modules of the GBT Project,” part of the CBM-FAIR International Project funded by DAE & DST, Govt. of India.
- Wrote test benches for various project modules using Xilinx Design Suite and performed timing analysis.

EDUCATION

Master of Technology (Integrated Course): Communication Systems

SASTRA University, Thanjavur | 2010 – 2015

CERTIFICATIONS (FULL LIST ON LINKEDIN / WEBSITE)

- Google Cloud – Generative AI Leader Certification
- The Linux Foundation – Kubestronaut (CKA, CKAD, CKS, KCNA, KCSA)
- Amazon Web Services – Solutions Architect Associate
- Red Hat – RHCE, RHCSA (Red Hat OpenStack)

ACCOMPLISHMENTS (FULL LIST ON LINKEDIN / WEBSITE)

- Spotlight Award — for innovating through empathy and understanding
- Spotlight Award — for coordinating with multiple teams and streamlining operations
- Appreciate Excellence (Renewal) — for outstanding support across multiple projects

HOBBIES & INTERESTS

Travel & photography • Aerospace & avionics • DIY projects on SBCs (Raspberry Pi) • Creating animations/videos
