- Kubestronaut with background in Embedded systems/Wireless technologies.
- 10+ years of experience in the field of Telco Cloud, worked with various CSPs globally.
- Experienced in building and managing large scale clusters with strong knowledge on Cloud Infra and Network Domain.

Work History

2023-09 –

Sr Engr CsIt-Cloud

Current

Verizon Data Services, Hyderabad

- Led the team in deploying Openshift clusters, leveraging on Metal3, Redfish APIs for automated Baremetal provisioning and host management.
- As a part of cloud operations team, I was involved in troubleshooting various issues in large scale OpenShift clusters. Developed good understanding of F5 SPK, Aspenmesh, Netapp and also protocols such as IP, IPv6, BGP, mTLS etc
- Used CI/CD pipelines for day-to-day operations and maintenance activities, contributed in building various automations and scripts for increased efficiency.
- Experienced in using GitLab, Prometheus, Grafana, ArgoCD, and several other inhouse tools.

2018-02 -

Solutions Specialist

2023-08

Nokia Solutions and Networks, Chennai

- Involved in E2E (from design, deployment to integration and testing) of various network functions on OpenStack and OpenShift.
- Obtained deep knowledge of network protocols (Ethernet, TCP/IP, networking stack, SIP, DIAMETER), 3GPP specs and network elements in 4G/5G domain.
- Proposed and developed custom solutions using bash, python and ansible leading to safer and faster operations

2016-01 -

System Engineer

2018-02

Tata Consultancy Services, Hyderabad

As a systems engineer, was involved in design and execution of automation and manual testing, worked on technologies and tools like HP ALM, Selenium, etc.

2013-08 -
2015-05

Research Assistant

SASTRA University, Thanjavur

- Involved in designing and building a wireless sensor network to continuously monitor the levels of toxic gases and there by ensure the purity of air, worked with LPC 2148 (based on ARM7) and Zigbee modules using UART protocol

2014-05 -
2014-06

Research Intern

Calcutta University, Kolkata

- Have worked under the project, "Simulation and Testing of Various Modules of the GBT Project", which is a part of CBM-FAIR International Project funded by DAE & DST, Govt. Of India.
- Involved in writing test benches for various modules of the project using Xilinx Design Suite and performing timing analysis.

Education

2010-06 -
2015-05

Master of Technology (Integrated Course): Communication Systems

SASTRA University – Thanjavur

Certifications (For complete list, please refer to my LinkedIn profile)

The Linux Foundation - Kubestronaut, CKS, CKAD

Amazon Web Services Solutions Architect Associate

Red Hat – RHCE, RHCSA in Red Hat OpenStack

Accomplishments (For complete list, please refer to my LinkedIn profile)

- Spotlight award for innovating through empathy and understanding
- Spotlight award for coordinating with multiple teams and streamlining operations
- Appreciate Excellence – Renewal – For outstanding support in multiple projects

Hobbies and Interests

- Travelling, exploring new places, cultures and food.
- Creating animations and videos for better visualization and understanding.
- Nature Photography and Editing.
- Interested in Aerospace and Avionics
- Exploring DIY projects on SBCs such as RaspberryPi.
